

**SPANISH DICTIONARY**

**GARCÍA ALBERTO**

## INTRODUCTION

amp.wordmeaning.org is an open and collaborative dictionary project that, apart from being able to consult meanings of words, also offers its users the possibility of including new words or nuancing the meaning of existing words in it. As is understandable, this project would be impossible to carry out without the esteemed collaboration of the people who follow us around the world. This e-Book, therefore, was born with the intention of paying a small tribute to all our collaborators.

GARCÍA ALBERTO has contributed to the dictionary with 14472 meanings that we have approved and collected in this small book. We hope that the reader is very valuable and if you find it useful or want to be part of the project, do not hesitate to visit our website, we will be delighted to receive you.

manrubio-caángay-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

## **mansedumbre**

It is said of the quality or quality or condition demanso

## **mansedumbres**

refers to lacondiciones or qualities of meek-

## **manso**

It's a river of Argentina, in the province of Río Negro, main tributary of Puelo River.

## **mansos**

belonging to a variety or species depino-black-

## **mantecosas**

belonging to a variety or species depera-

## **manzana del diablo**

Devil's apple-refers to a species of plum tree, wild shrub, small, thorny, bright green oval leaves with a strong aroma of almonds, pale flowers, fruits of yellow or orange-red color, pleasant taste. Generally, it has its habitat in forested regions-

## **manzana espinosa**

spiny apple- it is a genus of herbaceous plants annually of the solanace family, of which there are numerous species, branched erect stems, simple toothed leaves, spiny fruits in capsules with black seeds inside containing various types of alkaloids used in medicine as psychotropics; in general, it gives off a very strong smell, it is toxic to humans but not to animals and birds.

### **manzana guayaba**

Guava-apple refers to a species of plum tree, wild shrub, small, thorny, bright green oval leaves with a strong aroma of almonds, pale flowers, fruits of yellow or orange-red color, pleasant taste. Generally, it has its habitat in forested regions-

### **manzanas**

. belonging to the name of the manzano frutodel-

### **manzanas espinosas**

spiny apples-belonging to a genus of annual herbaceous plants of the solanaceae family, of which there are numerous species, of branched erect stems, simple toothed leaves, spiny fruits in capsules with black seeds inside that contain various types of alkaloids used in medicine as psychotropics; in general, it dismisses a very strong smell, it is toxic to humans but not to animals and birds.

### **manzanilla**

Chamomile-refers to a species of plum plum, shrub wild, small, thorny, bright green oval leaves with a strong aroma of almonds, pale flowers, fruits of yellow or orange-red color, pleasant taste. Generally, it has its habitat in forested regions-

### **manzanillas**

chamomiles-belonging to a species of plum tree, wild shrub, small, thorny, bright green oval leaves with a strong aroma of almonds, pale flowers, fruits of yellow or orange-red color, pleasant taste. Generally, it has its habitat in forested regions-

### **manzanillos**

belonging to one variety or species deolivo which gives the olive-yellow -

### **mapora**

. belonging to a variety or species depalma, Palm

### **mapurites**

-belonging to a species or variety demofeta americana-Su characteristic is strong and foul smell that secrete their Annals glands -

### **maracayáes**

-belonging to a species or variety deocelote, Ring-tailed, black and dotted white ears-

### **maracuyás**

. belonging to the name of the frutode Passiflora-

**maragatos**

. says, argentina-provincia Buenos Aires, for children born in town of Republic: Carmen de Patagones

**marcial**

He says the portion of aromatic powder with which they formerly had gloves.

**marciales**

relating or belonging to war or the militia

**marciales**

relating or belonging to the military. -

**marcialidad**

It says the quality of martial-

**marcianos**

relating or belonging to the planet Mars

**marcianos**

of the planet Mars

**marear**

referred to in aaturdir and apocar the bull turns and followed capotazos.

**marfik**

Marfik- refers to a star whose official name was approved on September 12, 2016, located in the constellation Ophiuchus-

**margallón**

. belonging to a variety or species depalma, Palm

**marghanna**

Marghanna- is the asteroid discovered by astronomer H. Vogt on December 9, 1912-

**maria-**

Maria- is the asteroid discovered by astronomer H. J . To. Perrotin on January 10, 1877-

**mariano**

name given to a variety or species (-) Mary Thistle

**marieva**

. belonging to one variety or species defresa, Strawberry -

**marinos**

relating or pertaining almar

**marinos**

relating or pertaining almar

**marisol**

belonging to a variety or species demandarina-

**marisoles**

belonging to a variety or species demandarina-

**maritales**

relating or belonging to the husband or the married life

**marítimo**

belonging to a variety or species depino-

**marítimos**

relating or pertaining almar

**markab**

Markab- refers to a star whose official name was approved on June 30, 2016, located in the constellation Pegasus-

**markeb**

Markeb- refers to a star whose official name was approved on September 5, 2017, located in the constellation Vela-

**marlene**

Marlene- is an asteroid discovered by astronomer K. W . Reinmuth on November 12, 1923-

**marlu**

Marlu- is the asteroid discovered by astronomer F. H . Kaiser on March 1, 1913-

**marmulla**

Marmulla-this is the asteroid discovered by astronomer J. Palisa on March 1, 1911-

**marojo**

. belonging to the name of the Arbutus frutodel-

**marojos**

.pertenecientes the name of the Arbutus frutodel, which prepares good spirits-

**maros**

belonging to a variety or species desalvia-white flowers-

**marplatenses**

. says, argentina-provincia Buenos Aires, for children born in town of Republic: Mar del Plata -

**marsic**

Marsic- refers to a star whose official name was approved on February 1, 2017, located in the constellation Hercules-

**marsopas**

-belonging to a species or variety small deballena, with the dolphins-

**marsupiales**

they are unashclase of mammals of a primitive type, whose female has a ventral pouch or baby carrier. -

**mascarena**

. belonging to a variety or species depalma, Palm

**masis**

-belonging to a species or variety American squirrel, it feeds on nuts, fungi, insects, fruits and various seeds -

**masitinib**

masitinib- according to a scientific publication of the journal Science, it is an extremely effective drug against the coronavirus, which, after being tested on animals, is being applied in France, to people who are hospitalized in an extremely serious state.

**maslos**

says of organs of quadruplets, they are different animals tail trunks-

**massalia**

Massalia-this is the asteroid discovered by astronomer A. Gasparis on September 19, 1852-

**massinga-**

Massinga- is the asteroid discovered by astronomer F. H . Kaiser on August 28, 1913-

**mastabas**

Egyptian funerary monuments in the form of truncated pyramids trunks.

**mastabas**

Egyptian funerary monuments in the form of truncated pyramids trunks.

**mastitis**

**mastitis**-refers to the expression : inflammation of breast tissue either the mammary gland in humans or the udder, in other mammals-

### **mastranto**

mastranto-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; it has opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical areas of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

### **mastranto o caángay**

mastranto or caángay-it is a species of herbaceous plant, annual, of the Asteraceae family, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

### **mata de infierno**

Hell-killer-it is a genus of annual herbaceous plants in the solanacea family, of which there are numerous species, branched erect stems, simple toothed leaves, spiny fruits in capsules with black seeds inside containing various types of alkaloids used in medicine as psychotropics; in general, it gives off a very strong smell, it is toxic to humans but not to animals and birds.

### **mata del infierno**

mata del infierno-it is a genus of annual herbaceous plants of the solanaceae family, of which there are numerous species, of branched erect stems, simple toothed leaves, spiny fruits in capsules with black seeds inside that contain various types of alkaloids used in medicine as psychotropics; in general, it dismisses a very strong smell, it is toxic to humans but not to animals and birds.

### **matalobos**

Matalobos-it is a perennial herbaceous plant, of the family of the ranunculaceae that can settle the meter and a half of height, of webbed leaves and blue flowers, grows in the center of Europe, near streams of water, extremely poisonous and is used in medicine as a sedative-

### **matalobos acónito**

Matalobos aconito- it is a perennial herbaceous plant, of the family of the ranunculáceas that can reach the meter and a half of height, of webbed leaves and blue flowers, grows in the center of Europe, near streams of water, extremely poisonous and is used in medicine as a sedative-

### **matalobos o acónito**

Matalobos or aconite-it is a perennial herbaceous plant, of the family of the ranunculaceae that can reach the meter and a half in height, of webbed leaves and blue flowers, grows in the center of Europe, near streams of water, extremely poisonous and is used in medicine as a sedative-

### **matalobos, acónitos**

Matalobos, aconites-belonging to a perennial herbaceous plant, of the family of the ranunculaceae that can reach the meter and a half in height, of webbed leaves and blue flowers, grows in the center of Europe, near streams of water, extremely poisonous and is used in medicine as a sedative-

## **matalobos-acónito**

Matalobos-aconite- it is a perennial herbaceous plant, of the family of the ranunculáceas that can reach the meter and a half of height, of webbed leaves and blue flowers, grows in the center of Europe, near streams of water, extremely poisonous and is used in medicine as a sedative-

## **matanceros**

. says, argentina-provincia Buenos Aires, for children born in town of Republic: the massacre -

## **matapiojo**

matapiojo-it is an annual plant, of the family of the ranunculáceas, of erect and hairy stems of 1m of height, large leaves, flowers intense blue color, fruits in black and rough capsules, with seeds inside that, like all the parts of the plant, are extremely toxic-From these seeds was obtained formerly, a product that was used to combat lice-

## **matapiojo albarraz**

matapiojo albarraz- it is an annual plant, of the family of the ranunculáceas, of erect and hairy stems of 1m of height, large leaves, flowers intense blue color, fruits in black and rough capsules, with seeds inside that, like all the parts of the plant, are extremely toxic-From these seeds was obtained formerly, a product that was used to combat lice-

## **matapiojo o albarraz**

matapiojo or albarraz-it is an annual plant, of the family of the ranunculáceas, of erect and hairy stems of 1m of height, large leaves, flowers intense blue color, fruits in black and rough capsules, with seeds inside that, like all the parts of the plant, are extremely toxic-From these seeds was obtained formerly, a product that was used to combat lice-

## **matapiojo, albarraz**

matapiojo, albarraz-it is an annual plant, of the family of the ranunculáceas, of erect stems and hairy of 1m of height, large leaves, flowers intense blue color, fruits in black and rough capsules, with seeds inside that, like all the parts of the plant, are extremely toxic-From these seeds was obtained formerly, a product that was used to combat lice-

## **matapiojo-albarraz**

matapiojo-albarraz- it is an annual plant, of the family of the ranunculáceas, of erect and hairy stems of 1m of height, large leaves, flowers intense blue color, fruits in black and rough capsules, with seeds inside that, like all the parts of the plant, are extremely toxic-From these seeds was obtained formerly, a product that was used to combat lice-

## **matapulgas**

matapulgas-It is a herbaceous plant species of the family of the caprifoliaceae, native to southern and central Europe and Southeast Asia. generic name Sambucus ebulus, which could reach 2 to 5m in height, erect stems, usually without branches, with opposite leaves of dark green color and strong smell, white or pink flowers, with a small, dark and very toxic fruit; It is used in medicine for its cardiotonic, sudorific, diuretic and laxative properties.

## **matar**

Matar- refers to a star whose official name was approved on August 21, 2016, located in the constellation Pegasus-

## **matasellos**

postmark-Rubber stamp used in post offices to cancel the stamps of letters and packages, so that they cannot be used again. -

**matatopo**

matatopo- it is a genus of herbaceous plants annually of the solanacea family, of which there are numerous species, branched erect stems, simple toothed leaves, spiny fruits in capsules with black seeds inside containing various types of alkaloids used in medicine as psychotropics; in general, it gives off a very strong smell, it is toxic to humans but not to animals and birds.

**matatopos**

matatopos-belonging to a genus of annual herbaceous plants of the nightshade family, of which there are numerous species, of branched erect stems, simple toothed leaves, spiny fruits in capsules with black seeds inside containing various types of alkaloids used in medicine as psychotropics; in general, it gives off a very strong smell, it is toxic to humans but not to animals and birds-

**mathesis**

Mathesis- is the asteroid discovered by astronomer F . K . To. Schwassmann on March 28, 1900-

**matidez**

It says the quality or quality or condition demate, dull

**matilalcula**

God's lasaguasen the mitologiaazteca

**mattiaca-**

Mattiaca- is the asteroid discovered by astronomer F. H . Kaiser on September 26, 1913-

**mauritia**

Mauritia- is the asteroid discovered by astronomer F. H . Kaiser on March 1, 1913-

**mausoleos**

are called this way to the sumptuous tombs.

**maxilares**

relating or belonging to laquijada or mandible

**maxilofaciales**

relating or belonging to loshuesos of the face

**mazaalai**

Mazaalai- refers to a star whose official name was approved on March 1, 2020, located in the constellation Ursa Maior-

**mazacote**

mazacote - refers to the expression: paste made of sugar residues that remain attached to the bottom and walls of the boiler to produce it-/ / any object of coarse and heavy art - // thing dry hard and sticky -

**mazmorras**

refers to the subterranean prisons.

**márahu**

Márohu- refers to a star whose official name was approved on December 17, 2019, located in the constellation Aquarius-

**máximo solar**

solar maximum-This is the period, every eleven years, of maximum activity in the cycle corresponding to sunspots, where the most of them appear-

**máximos solares**

solar maximums-belonging to the period of maximum activity in the cycle of sunspots-

**mcIntosh**

belonging to a variety or species demanzana-

**mebsuta**

Mebsuta- refers to a star whose official name was approved on July 20, 2016, located in the constellation Gemini-

**meconio**

ael concerns first excrement of vaccines calves.

**mecópteros**

Mecopterosses is of a // unaorden of insects, with four wings of equal length, and whose larvae live in soil. ( Fly Scorpion belongs to the mecopteros order. )

**medalla**

round and elliptical medal-bas-relief-

**medallas**

medals-belonging to the round and elliptical bas-relief

**mediano**

It is said the quality / quality or condition intermediate, neither good nor bad -

**medicinales**

medicinal = says who have or poseen capacidad heal or maintain health.

**medievales**

relating or belonging to age of history

**medregal**

medregal-refers to the term : Pacific-specific perched marine fish

**medroso**

Medroso-refers to the expression: individual who of anything is afraid-

**medusa**

fabulous animal / monstruoque was killed by Theseus -

**medusa-**

Medusa- is the asteroid discovered by astronomer H. J . To. Perrotin on September 21, 1875-

**megaira**

Megaira- is the asteroid discovered by the astronomer M. F . Wolf on January 9, 1901-

**megrez**

Megrez- refers to a star whose official name was approved on June 30, 2016, located in the constellation Ursa Maior-

**meissa**

Meissa- refers to a star whose official name was approved on July 20, 2016, located in the constellation Orion-

**mejorana chaparro**

chaparro marjoram- it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; it has opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical areas of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

**mejorana chaparro caángay**

Mejorana chaparro caángay-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

**mejorana chaparro o caángay**

marjoram chaparro or caángay-it is a species of herbaceous plant, annual, of the Asteraceae family, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

**mejorana chaparro,caángay**

marjoram chaparro, caángay-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

**mejorana chaparro-caángay**

marjoram chaparro-caángay-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

**mekbuda**

Mekbuda- refers to a star whose official name was approved on September 12, 2016, located in the constellation Gemini-

**meladura**

meliture-refers to the expression : pre-syrup to make sugar-

**melanie-**

Melanie- is the asteroid discovered by astronomer J. Palisael August 25, 1909-

**melapias**

belonging to a variety or species common demanzana-

**melar**

melar says what has or possesses flavored honey.

**melares**

belonging to a variety or species blanco-pequeno dehigo - round and very sweet -

**meleph**

Meleph- refers to a star whose official name was approved on September 5, 2017, located in the constellation Cancer-

**melete**

Melete-this is the asteroid discovered by astronomer H. M. s. Goldschmidtel on September 9, 1857-

**melibeo**

It is one of the pastors of the eclogues by Virgil. -

**meliboea**

Meliboea- is the asteroid discovered by astronomer J. Palisael on April 21, 1874-

**meliceris**

or meliceride, it is a Sebaceous Cyst that contains a substance of the colour and consistency of honey. -

**melicerta**

in literature, heroic pastoral comedy in two acts and verse, written by Molière, premiered in 1666. -

**melicrato**

one of the names that receives water is honey. -

**melindre**

melindre-refers to the expression : delicacy affected and excessive in words, actions or ademanes-

**melindres**

melindres-belonging to the expression : delicacy affected and excessive in words, actions or ademanes-

**melis**

belonging to a variety or species depino-black-

**melitta-**

Melitta- is the asteroid discovered by astronomer P . J . Melotte on January 16, 1909-

**melíferos**

tieneno carrying honey

**melífluos**

tieneno distilled or resemble honey.

**mellado**

Person, object or thing missing one or more teeth.

**melojos**

belonging to one variety or species deroble -

**melolontas**

Melolontas-belonging to the expression: insect Coleoptera pentámero very harmful for vegetables-

**meloncillos**

-belonging to a species or variety European demangosta of small ears and long, dark hair-

**melones**

-perteneccientes the name of the frutodel melon-

**melopea**

name given to the art of producing melodies.

**melón**

. belonging to the name of the frutodel melon-

## **melpomene**

Melpomene-this is the asteroid discovered by astronomer J. R. Hind on June 24, 1852-

## **melusina**

Melusina-is the asteroid discovered by astronomer A. H. Charlois on September 15, 1893-

## **membrillo de monte**

Mount quince-refers to a species of plum tree, shrub wild, small, thorny, bright green oval leaves with a strong aroma of almonds, pale flowers, yellow or orange-red fruits, pleasant tasting. Generally, it has its habitat in forested regions-

## **membrillos**

. belonging to the name of the Quince frutodel-

## **memo**

memo - refers to the expression: necia, dumb, boba - the person

## **memoriosos**

memorious = says who have or poseenbuena memory.

## **memoristas**

thesis = says who have or poseenbuena memory.

## **mendocinos**

in the Republic of Argentina, it is said of the Mendoza Province naturalesde

## **menelao**

is Paris elasesino-

## **menippe**

Menippe- this is the asteroid discovered by astronomer C. H . F . Peters, June 18, 1878-

## **meníngreas**

relating or belonging to the meninges-membranes

## **menkalinan**

Menkalinan- refers to a star whose official name was approved on July 20, 2016, located in the constellation Auriga-

## **menkar**

Menkar- refers to a star whose official name was approved on June 30, 2016, located in the constellation Cetus-

## **menkent**

Menkent- refers to a star whose official name was approved on August 21, 2016, located in the constellation Centaurus-

## **menkib**

Menkib- refers to a star whose official name was approved on September 12, 2016, located in the constellation Perseus-

## **menores**

comparative adjective of " " small " ". -

## **menta**

. belonging to another name of peppermint; medically we can say that anti-inflammatory, it clears the respiratory tract and is therefore useful for treating respiratory disorders such as asthma. -

## **mentados**

says those who have some fame or popularity. -

## **mentastro**

mint-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; it has opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical areas of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

## **mentastro caángay**

mentastro caángay- it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

## **mentastro o caángay**

mentastro or caángay-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

## **mentastro,caángay**

mentastro, caángay-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

## **mentastro-caángay**

mentastro-caángay-it is a species of herbaceous plant, annual, of the family Asteraceae, about 70 cm high, very toxic, considered a weed, native to South America; It presents opposite leaves, small pink or white flowers of nauseating smell, becoming a weed of the tropical zones of the world-It is used medicinally as an antibacterial or antiarthritic, also, for its essential oils, it is used in cosmetics; is toxic to mammals-

## **mentha**

Mentha- is an asteroid discovered by astronomer K. W . Reinmuth on December 7, 1926-

**mentira**

lie-is a basic characteristic of the human being and, even though as a child we are educated with the slogan of not lying, it is something that no one can escape. And it is done to obtain some benefit, power, status, money, sex, get jobs, avoid paying taxes, have extramarital relations or, politicians, to stay in power

**mentiras**

lies-belonging to a basic peculiarity presented by each human being, very difficult to eradicate even though from a very young age we are educated with the premise of not lying, it is always used to achieve some benefit- On many occasions, lies become a pathology, mitomania-

**merak**

Merak- refers to a star whose official name was approved on June 30, 2016, located in the constellation Ursa Maior-

**mercado negro**

popular phrase corresponding to " " underground market, outside the law " ". -

**mercantiles**

relating or belonging alcomercio.

**mercantiles**

relating or belonging almercader, to the goods or trade-

**mercedinos**

. says, argentina-provincia Buenos Aires, for children born in town of Republic: Mercedes -

**mercuriales**

relating or pertaining alDios mercury or the planet that bears his name

**mercurianos**

relating or belonging alplaneta mercury

**mercuriesco**

relating or belonging to the Dios mercury.

**mercurioscos**

relating or pertaining alDios mercury

**mercúricos**

relating or belonging almercurio, element chemical-

**merga**

Merga-refers to a star whose official name was approved on September 12, 2016, located in the constellationBootes-

**meridiana**

Meridiana- refers to a star whose official name was approved on September 5, 2017, located in the constellation Corona Australis-

**meridiano**

It is said every one of the semicircles of the terrestrial sphere ranging from pole to pole.

**meridiano**

It's a kind of sofa without backrest or arms, which is used as a seat and also to lie down.

**meridianos**

relating or belonging to the noon lashoras

**meridionales**

relating or belonging to the South or at noon

**merogenéticos**

relating or belonging to lasegmentacion from the egg or embryo or merogenesis, in biology-

**merogenia**

It refers to the development of a portion of the egg or embryo, biology. -

**merogénesis**

refers to the segmentation of the egg or embryo, biology-

**merología**

It refers to the Treaty of simple or elementary parts. -

**merope**

name of a monumental work type tragedy, written by Voltaire in the year 1748 // there is another tragedy written by Alfieri -
