

SPANISH DICTIONARY

John Rene Plaut

INTRODUCTION

amp.wordmeaning.org is an open and collaborative dictionary project that, apart from being able to consult meanings of words, also offers its users the possibility of including new words or nuancing the meaning of existing words in it. As is understandable, this project would be impossible to carry out without the esteemed collaboration of the people who follow us around the world. This e-Book, therefore, was born with the intention of paying a small tribute to all our collaborators.

John Rene Plaut has contributed to the dictionary with 11532 meanings that we have approved and collected in this small book. We hope that the reader is very valuable and if you find it useful or want to be part of the project, do not hesitate to visit our website, we will be delighted to receive you.

definición de estado de sitio

SITE STATUS DEFINITION View SITE STATUS

definición técnica o científica de negativo para covid

TECHNICAL OR SCIENTIFIC DEFINITION OF NEGATIVE FOR COVID . The PCR or PolymerASE Chain Reaction is a test in which a DNA fragment is duplicated such a number of times that it is made very easy to detect the presence of viruses, bacteria and other pathogens, MOLECULAR MEDICINE, as well as determine murder-causing, paternity and many crimes. The duplication is done every hour approximately and at 30 hours we have about 1.2 billion duplications which makes the analysis very accurate. The result, when we are looking for SARS covid-19 can give positive (sick) or negative (healthy) , that is, it gave negative for SARS covid-19, but it is not pronounced over other pathogens. Now, some erroneous results are given, false positives and false negatives. They shrink as duplication increases. 1000 million is a large enough number, but it is not 100% accurate. For this reason the results take from 2 to 3 days (and more in pandemic, due to the at nighting of samples)
